PROFILE

I am a newly graduated Master of Engineering in Bioinformatics from DTU with my thesis carried out in collaboration with Novo Nordisk. I have hands-on experience developing machine learning pipelines in PyTorch on large-scale HPC infrastructure, in addition i have experience working with the full stack of build with Go, PostgreSQL, and React. I thrive at the intersection of technology and problem-solving, and I am comfortable both working close to technical detail and communicating findings to diverse audiences. I continuously seek to expand my technical toolkit — reflected in my personal project portfolio at my website.

EXPERIENCE

Software Developer

April 2026 – present

[Overskud.dk](#)

- Full-stack development with Go microservices, PostgreSQL, and React/TypeScript
- Database optimization, normalization, and SQL query tuning
- CI/CD pipelines with GitHub Actions and Docker Compose orchestration
- Collaborative development in a fast-paced startup environment

Masters Thesis @ Novo Nordisk

Feb 2025 – Jan 2026

[Robust cell typing in homogeneous scRNA-seq data](#)

- Developed and trained deep learning models (VAEs and diffusion models) in PyTorch
- Built end-to-end data processing pipelines in Python and R for large-scale datasets
- Worked daily on HPC infrastructure with SLURM for distributed computing
- Applied statistical methods and machine learning for data analysis and evaluation
- Organized and structured code with comprehensive documentation and Git version control
- Collaborated across departments and presented findings to technical and non-technical audiences

Research Assistant

July 2023 – Aug 2024

[4Life Solutions Aps · Copenhagen, DK](#)

- Independently structured and prioritized weekly tasks within project deadlines
- Data collection, analysis, and documentation for research projects
- Weekly presentation of analytical findings to stakeholders

Event Coordinator

July 2021 – Aug 2025

[Egmont H. Petersens Kollegium · Copenhagen, DK](#)

- Safety and logistics at events with 1,000+ attendees
- Coordinating across diverse teams, problem-solving under pressure

EDUCATION

MSc Eng. Bioinformatics & Systems Biology

Sept 2023 – Dec 2025

[Technical University of Denmark](#)

- Machine learning, deep learning, statistical modeling, and computational biology
- Coursework:** Next-generation sequencing, Applied Genomics, Software Architecture, HPC, Machine Learning
- Grade:** 12/12 (thesis), GPA 10.35

Exchange Semester

Fall 2022

[University of Sydney, Australia](#)

- Genomics and genome assembly; studying and working in an international environment

BSc Natural Resources

Sept 2020 – June 2023

[University of Copenhagen](#)

- Interdisciplinary program combining natural sciences with environmental economics and policy
- Thesis:** Effects of single prophage inserts on reduced-genome *E. coli*
- Grade:** 10/12 (thesis), GPA 9.53

PROJECTS

Deployed ML Service

[Website](#)

- End-to-end ML service with FastAPI backend and Docker deployment

SKILLS

🔗 Programming

Python (advanced)
R · Bash · SQL
Go · C++ · TypeScript
Rust (learning)

🧠 Machine Learning

Deep learning · PyTorch · HPC
LLM API integrations

🗄️ Data & Databases

PostgreSQL · SQL
Data pipelines — Pandas · NumPy
Data visualization

🔧 DevOps & Infrastructure

Docker · Docker Compose
Git · GitHub Actions
HPC / SLURM
FastAPI

🐧 Operating Systems

Linux (Arch, daily driver)
Unix / CLI proficient

LANGUAGES

Danish (native)
English (fluent, 112/120 TOEFL)
German (beginner)

OUTSIDE OF WORK

🏔️ **Sports climbing:** active boulderer

🎵 **Men's choir:** 2nd tenor in Copenhagen choir

🎺 **Trumpeter:** enjoy playing brass in orchestras

🏠 **Home lab:** custom Arch Linux rice, dotfiles, and personal side projects

- **Stack:** Python, scikit-learn, FastAPI, Docker, TypeScript

Computer Vision – Deep Learning at DTU

Report

- Image analysis and segmentation using convolutional neural networks
- **Stack:** Python, PyTorch, Computer Vision

Automated Data Pipeline

Website

- Data extraction, processing, and LLM API integration in Python
- **Stack:** Python, Anthropic API, Playwright

Rust – Bioinformatics Algorithms

Website

- Implementing data processing algorithms through Rosalind challenges
- **Stack:** Rust, algorithms, data structures

OTHER WORK EXPERIENCE

Waiter & Beer Sommelier

2019 – 2023

[Skaal Craft Beer and Food](#)

- Delivered engaging beer presentations to guests, sharpening the ability to convey information clearly to audiences of varying prior knowledge

Math Tutor

2019 – 2023

[Mentor Denmark](#)

- Helping high school students, adapting explanations to different skill levels
